

Stand together! No.19

Working as a Volunteer in the Rengo Project

JRU has participated in the RENGO volunteer work project such as cleaning up the street gutters in the disaster-hit area since 19 June. In the project, each participant stays in the disaster-stricken region for 8 days. The two JRU teams have been to Sendai area so far to work with workers from other unions.

JRU launched to help the stricken members immediately after the 3.11 disaster with the support of workers across Japan. In the JRU Congress held on 5-6 June, we reviewed our work and declared that we will continue to support them. Members from the affiliated unions are joining the volunteer work in the coming months.
